Product Description

2D bending machine bending punching machine lampshade flat iron punching machine

Product Description

2D forming machine is a plane 2D wire bending forming machine. The forming process of wire shapes with different specifications can be realized through various transformations of molds. There are servo feeding + hydraulic cut-off combination, servo feeding + servo cut-off and full servo combination, which can be selected according to the size of actual products to achieve the highest cost performance. According to the needs of products, chamfering, arc punching, punching and other functions can also be added to achieve wider application and use.

Multifunctional, achieve dual functions. Molding, punching, one finish

Bending + punching

Widely used for lamp shade products
