Performance characteristics

- 1.Servo feeding, fast looping speed, hydraulic cutter, simple and fast, great strength. Making circle + butt welding can be completed at one time, saving time, labor and labor.
- 2.The whole machine CNC lathe + CNC milling has good coordination and precision. It is more guaranteed than similar products, faster and more efficient.
- 3.PLC programming + man-machine interface, simple debugging, Omron 2000 pulse encoder, more accurate identification. Beginners are easy to get started. It also has forward and backward, automatic and manual functions, which is convenient for debugging. Debugging OK is direct and automatic without human supervision.

Structural details are displayed one by one:

1. Horizontal and vertical two groups of straightening guard wheel, thickened and hardened, double ball. The safety wire is well straightened and more durable.

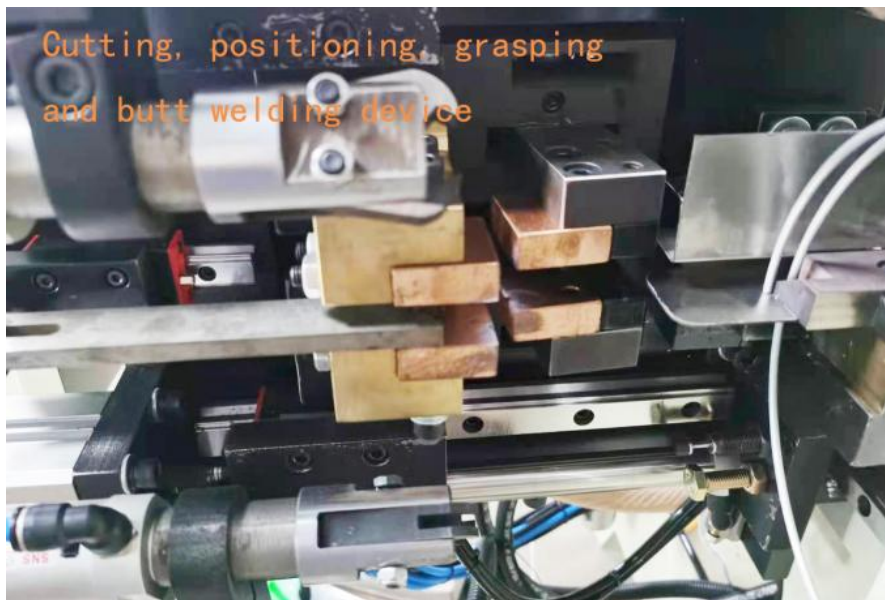

2. 4 groups, 8 wire feeding forming wheels, with large force, stability and wear resistance. There are only 3 groups and 6 similar machines from other manufacturers. Moreover, the processing is accurate, and the surface of the trunking is specially smooth.

3. The increased and thickened all red copper strip with special insulation has stronger conductivity and more guarantee for welding. The surface is transparent and can be seen with real materials.

4. Cutting, positioning, grasping and butt welding devices are completed at one go.
