

Cylinder Stainless Steel Spot Welding Machine 50mm Row Welding Machine **For Fence**

Basic Information

- Place of Origin:
- Brand Name:
- Certification:
- Model Number:
- Minimum Order Quantity:
- Price:

Guangdong, China

Jin Hongxiang

CE

- Packaging Details: Delivery Time:
- Supply Ability:
- JD-80 1 set Negotiable Export safety wooden case 5-10 working days. Or negotiation

Building Cover Plate, Railway / Road

Taiwan's Water-cooled Wet Control Transformer Will Not Be Affected By

Sufficient Power, Beautiful Welding, Firm

Welding, Multi-point Welding

Touch Electric Box Control

Guardrail, Pet Cage, Storage Rack, Net

50 Set/Sets per Month

Spot Welder

Basket

80KVA

380V, 50HZ

Overload

430 KG

50MM

Product Specification

- Product Name:
- Applicable Industries:
- Rated Capacity:
- Usage:
- Voltage:
- . Key Selling Points:
- Weight (KG):
- Control System:
- Cylinder Stroke:
- Nominal Frequency:
- Feature:

50/60HZ

And Fast Response Change Ching

Product Description

Spot welding machine row welding machine for fence

Spot welder application

Resistance welding has the characteristics of high production efficiency, low cost, material saving and easy automation, so it is widely used in all walks of life. Now I will list the applications of spot welding machines in various industries and the types of spot welding machines that are suitable for them.

1. Electronics industry: medium frequency inverter spot welding machines and precision spot welding machines are also widely used in the electronics industry;

2. Automobile manufacturing industry: suitable models include mobile spot welding machine and hand-held spot welding machine;

3. Commodity hardware: such as coffee pot, basin, kitchen sink and other industries. Suitable for girth welding machine, straight seam welding machine and roll welding machine;

4. Jewelry industry: manufacturers of earrings, jewelry, headwear, etc., suitable for precision spot welding machines, medium frequency spot welding machines, desktop spot welding machines.

5. Home appliance industry: such as air conditioner and water heater. Multi spot welder, backplate multi spot welder and hand-held welder are recommended;

6. Screen industry: recommended gantry wire mesh welding machine, full brake gantry reciprocating welding machine, semi-automatic gantry welding machine, medium frequency inverter welding machine, etc;

7. Fence industry: multi spot welding, row welding machine, circular butt welding machine and touch welding machine are recommended. Different spot welding machines have different performances. When selecting a spot welding machine suitable for your own industry, you should pay attention to safety and operate in a ventilated environment.

Other names

Spot welder, air pressure spot welder, butt welder, pneumatic spot welder, welder, pneumatic welder, iron sheet spot welder, nut spot welder, stainless steel spot welder, special spot welder, mesh spot welder, wire mesh spot welder,

Spot welding machine, touch welding machine, multi spot welding machine, welding machine, sheet metal spot welding machine, nut spot welding machine, stainless steel spot welding machine, special spot welding machine, mesh spot welding machine, , row welder, multi spot welder, high-power spot welder, iron wire spot welder, AC spot welder, 3-phase spot welder, galvanized plate spot welder, Battery spot welder, multi cylinder spot welder, DC spot welder,

air pressure spot welding machine, butt welding machine, medium frequency spot welding machine, high-power spot welding machine, wire spot welding machine, AC spot welding machine, galvanized sheet spot welding machine, battery spot welding machine, multi cylinder spot welding machine, touch welder, medium frequency spot welder, precision spot welder, resistance spot welder, spot welding machine, customized spot welder, Taiwan spot welder, gantry spot welder, small spot welder,

row welding machine, pneumatic spot welding machine, welding machine, pneumatic precision spot welding machine, resistance spot welding machine, three-phase spot welding machine, Customized spot welding machine, Taiwan spot welding machine, gantry spot welding machine,

wire mesh spot welding machine,

Tooling or fixture of the machine

The spot welding machine is a row welding machine. Because of the different products, it is necessary to do some positioning tooling or fixtures for the workpiece to facilitate more suitable welding of the workpiece. These can be customized as required. The main machine remains unchanged.

Row welding die

Spot welding die

Product Description

Performance characteristics

1. Cylinder direct pressure mechanism, good follow-up performance, fast welding speed, combined cylinder, Taiwan AS2410 large flow solenoid valve. Taiwan AS2410 solenoid valve has strong suction and sensitive response. It is ideal for continuous row welding of mesh.

2. All red copper water cooling temperature control device of transformer has the advantages of long service life, low noise, safety and convenient use.

A. Taiwan transformer features: sufficient capacity, greater welding force and stronger conductivity.

B. Water circulation cooling, which can be used within the rated range to ensure 24 hours of operation.

C. Moreover, the temperature control device can work overload and automatically cut off power to protect the whole machine from being affected.

3. The water-saving forced cooling mode is adopted, and the main circuit adopts high-power SCR contactless switch, with high conductivity and low power loss, High temperature automatic protection.

Technical parameters:

Technical parameters:								
Model	Rated power KVA	Input voltage V	Nominal frequenc y HZ		arm length mm	ectrode travel MM	Cooling water volume	Weight KG
JD-60	60	380	50/60	22000	600	50	10	350
JD-80	80	380	50/60	28000	600	50	10	400
JD-100	100	380	50/60	30000	600	50	10	430
JD-120	120	380	50/60	32000	600	50	12	460
JD-150	150	380	50/60	34000	600	50	12	500
JDX-35	35	380	50/60	15000	400	50	/	197
JDX-50	50	380	50/60	20000	400	50	/	248

For row welding and fence welding, multiple spot welding machines can be used at one time. We have high standards. Our advantages are more obvious, row welding speed is faster, reaction speed is more than 30% higher than that of the same industry, and the welding effect is more beautiful and firm.

We always attach great importance to product quality. Before leaving the factory, it will be fully aged and debugged. And we always adhere to the principle of "providing customers with better quality, better price and better service.
